Next Steps

We bring **clarity** into **decision-making**

Galde is a Business Intelligence and Data Science company running since 2020.

We have worked on multiple projects related to systems such as ERPs, MRPs, CRMs, dashboards and predictive models, where we support organizations to make **faster and better decisions**, saving thousands of euros per week and avoiding bankruptcy situations.

Read the following questions:

What do your managers base on to make correct decisions?

What and how much does your employee produce per hour?

What is your profit per employee?

How much time does your team have to dedicate day by day to generating reports?

What do customers think of your brand?

What is your absenteeism rate per day?

If any of the previous
questions created **discomfort**,
we can help you.

Testimonials of our work

*"Thanks to Galde's work, we can **plan our production** and **discard projects** that are not profitable."*

*"Galde has allowed us to **align the sales team**, being able to begin to establish common objectives and work tools."*

*"Before we had no idea of the acceptance our brand had in the market. Thanks to Galde's work, we now know **which services to focus on** so that our business grows exponentially."*

*"Every week, I had to lose a day to compile the work done by my collaborators. After Galde helped us, **I have that entire day to myself**, with all the relevant information just a few clicks away."*

Success stories

How do we work?

1

We **organize** your information,
and if you don't have it,
we **create it with you**.

2

We **analyze and visualize**
the data you need,
how you need them.

3

Optimize your company
and **save time, money,**
and **wrong decisions**.

Benefits

Constant Analysis

It facilitates the constant measurement of the indicators that the organization considers most relevant to its business.

Extend the duration of your Investments

In every project, Galde understands the needs of your organization to adjust the development to be carried out to your context.

Integration

The platforms that Galde provides operate autonomously and can be exported to different formats, although the development of ad-hoc APIs can be requested.

Indicator Templates

Thanks to Galde's experience in multiple sectors, we have customizable indicator templates for different scenarios.
